Idsa Cap Guidelines 2014 - wiki.ctsnet.org
Improving the care of adult patients with community-acquired pneumonia (CAP) has been the focus of many different organizations, and several have developed guidelines for management of CAP. Two of the most widely referenced are those of the Infectious Diseases Society of America (IDSA) and the American Thoracic Society (ATS).

**Infectious Diseases Society of America/American Thoracic Society**

Improving the care of adult patients with community-acquired pneumonia (CAP) has been the focus of many different organizations, and several have developed guidelines for management of CAP. Two of the most widely referenced are those of the Infectious Diseases Society of America (IDSA) and the American Thoracic Society (ATS).

**Infectious Diseases Society of America/American Thoracic Society**

The last American Thoracic Society (ATS)/Infectious Diseases Society of America (IDSA) HAP/VAP guidelines, published in 2005 [1], provided evidence-based recommendations for the prevention, diagnosis, and treatment of HCAP, HAP, and VAP. Since 2005, new studies have provided additional insights into diagnosis and treatment of these conditions.

**Hospital-acquired and Ventilator-associated Pneumonia (HAP)**

Recommendations for the management of CAP are detailed in the Infectious Diseases Society of America (IDSA)/American Thoracic Society (ATS) guidelines. These guidelines were last updated in 2007, and an update is expected within the next year. It is expected that the upcoming guidelines will ...

**Management of Community-Acquired Pneumonia in Adults**

Guidelines for the management of adults with HAP and VAP were recently published through the collaboration of two societies—the Infectious Diseases Society of America (IDSA) and the American Thoracic Society (ATS). Although the concept of healthcare-associated pneumonia was included in the previous version of the guidelines, the 2016 update ...
